Hi Don\_VA7DGP, To make a device work well, we should get compatible drivers The drivers are released by the device manufacturer.. I recently bought a new desktop, and everything's been running fine, except I noticed this issue: Upon going into my devices and printers, there's a little troubleshooting triangle next to my desktop's symbol, so I troubleshooted it, told me PCI and SM Bus Controller had no drivers.

It is commended to download the Windows 10 compatible driver from the device manufacturer website..
